COURSE OBJECTIVE

Every used reusable item/instrument must be safe for handling by the staff and use on the patient. This course will provide the fundamental knowledge and application skills required to handle and manage reusable items/instruments safely; and the important role in patient care to prevent infections.

LEARNING OUTCOME

Upon completion of this course, the participant should be able to:

1. Prepare, check and use cleaning equipment
2. Sort, identify, clean and decontaminate surgical instruments
3. Check, assemble and pack surgical instruments and sets
4. Demonstrate basic knowledge in sterilization and use of sterilization process indicators
5. Manage the sterile storage area and rotation of sterile items
6. Perform distribution of sterile items and collection of used reusable instruments safely
7. Observe the safety requirements at the workplace

REGISTRATION FEE

ICAS members: \$540.00

ICAS non-members: \$600.00
